

[Guide for Using the Bluetooth Headset with your S750](#)

Be sure to read the headset manual and confirm the Bluetooth password (Bluetooth passkey) of the headset before doing the Bluetooth operation.

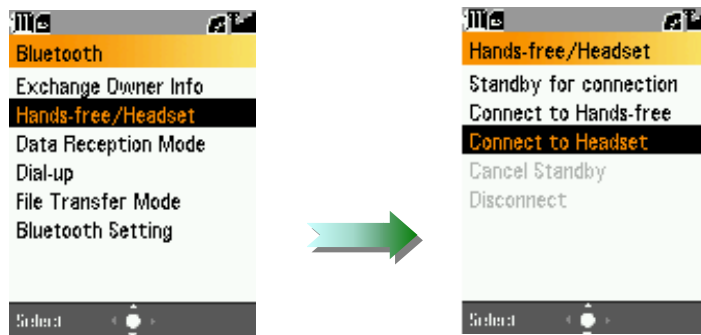

We recommend you to first register the headset you want to use on your S750 so that the connection becomes easier when using the headset for talking. (Searching operation becomes easier and the password authentication will not be required if you register the headset.)

[Registering a Bluetooth headset on your S750](#)

1) Activate the reception mode of the headset to start connection.

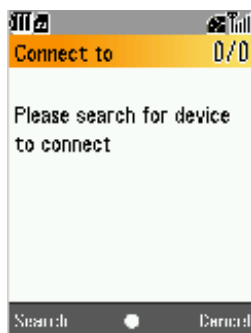

Note: Read the headset manual to activate the reception mode.

2) On your S750, press the right soft key [Menu] → **Settings** → **Connectivity** → **Bluetooth** → **Handsfree/Headset**

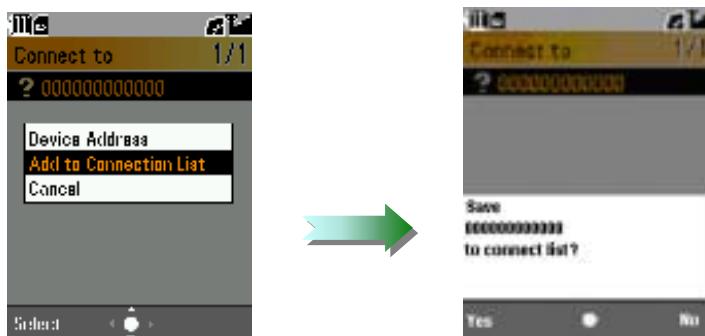

3) Select **Connect to Headset** and press OK.

4) Press the left softkey [Search].

- When the headset is searched, the connection list appears on your S750.

5) Select the headset you want to use in the list and press [Options] → **Add to Connection List** → [Yes]

- Select one device from the list.

6) Enter the Bluetooth password (passkey).

Now the connection becomes easier. Here are ways to connect your S750 to the headset. To use the headset for making or receiving a call, you need to activate the headset first and then establish the connection. Before proceeding to “Using the Bluetooth headset for making or receiving a call” please review how to connect as stated below.

[Connecting your S750 to the headset](#)

Several ways are available to establish connection.

A) By using the registered headset (see above for how to register the headset on your S750)

- 1) Activate the reception mode of the headset to start connection.
- 2) On your S750, press the right soft key [Menu] → **Settings** → **Connectivity** → **Bluetooth** → **Handsfree/Headset** → **Connect to Headset**
- 3) Select the headset you want to use and press OK.

B) By using the headset to start connection

If you used the headset before it may be possible to establish the connection from the headset by setting the S750 on Standby for Connection. Read the headset manual for how to activate the connection to use this feature.

1) Activate “Standby for Connection” on your S750.

- On your S750, press the right soft key [Menu] → **Settings** → **Connectivity** → **Bluetooth** → **Handsfree/Headset** → **Standby for Connection**

2) When you see the  icon on your S750, activate the headset.

C) If no headset is registered before

It is possible to connect your S750 to the headset without registering the headset to the Add to Connection List.

- 1) Activate the reception mode of the headset to start connection.
- 2) On your S750, press the right soft key [Menu] → **Settings** → **Connectivity** → **Bluetooth** → **Handsfree/Headset** → **Connect to Headset**
- 3) Press the left softkey [Search].
- 4) Select the headset you want to use in the list and press OK.
- 5) Enter the Bluetooth password (passkey).

Using the Bluetooth headset for making or receiving a call

A) Making a call

- 1) Connect your S750 to the headset. (See above “Connecting your S750 to the headset.”)
- 2) Make a call using your S750.
- 3) Once the call is connected, press [Options] → **Connect to Bluetooth**

Note: You may be able to make a call using the headset to your last redialed phone number or a certain contact location number in the phonebook. Read the headset manual for how to call using the headset.

B) Receiving a call

Be sure to connect your S750 to the headset before receiving a call using the headset. (See above “Connecting your S750 to the headset.”)

- 1) Follow the headset manual to receive a call.

Or

Receive a call using your S750, then press [Options] after connecting → **Connect to Bluetooth**
