

Bluetooth™ Headset Guide

Be sure to read your headset user guide and confirm your headset's Bluetooth password (Bluetooth passkey) before performing any operations.

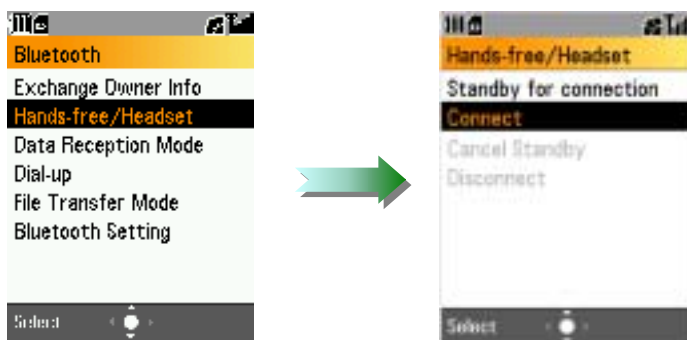

We recommend you to first register the headset you want to use on your S750/S750i so that the connection (searching operation) becomes simpler and eliminates the need for password authentication later on.

Registering a Bluetooth headset on your S750/S750i

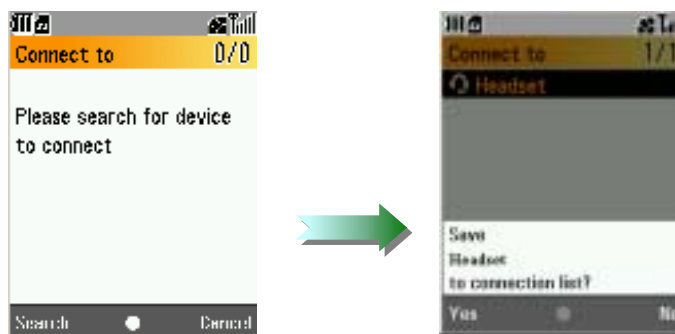

1. Activate the reception mode on the headset to start connection.

Note : Read the headset user guide to activate the reception mode.

2. On your S750/S750i, press the right soft key [Menu] → **Settings** → **Connectivity** → **Bluetooth** → **Hands-free/Headset**

3. Select **Connect** and press OK.
4. Press the left softkey [Search].

- When the headset is searched, the connection list appears on your S750/S750i.
5. Select the headset you want to use in the list and press OK, then [Yes].
 6. Enter the Bluetooth password (passkey). The passkey should be indicated in the headset user guide.

The following indicates methods for connecting your S750/S750i with your headset. To use the headset for making or receiving a call, you need to turn on the headset and activate reception mode on one of the devices before trying to establish a connection. Before proceeding to “Using the Bluetooth headset for making or receiving a call” please read the following on how to connect the S750/S750i with your headset.

Connecting your S750/S750i with the headset

There is more than one way to establish connection. Depending on your headset model you may need to first register the device to the connection list before proceeding. (See previous page). Refer to your headset user guide for further details regarding connection list registration, reception mode, and connection activation and other operations.

(A) Connecting from the S750/S750i to the headset

1. Activate the reception mode on the headset to start connection.
2. On your S750/S750i, press the right soft key [Menu] → Settings → Connectivity → Bluetooth → Hands-free/Headset → Connect
3. If your headset is already in the connection list, select it from the list and press OK. Otherwise, Press the left soft key [Search], select your headset and press OK to connect.

(B) Connecting from the headset to the S750/S750i

1. Activate standby for connection (Hands-free/Headset) on your S750/S750i.
 - Press and hold OK from the Standby display
2. When you see the  icon on your S750/S750i, turn the headset on and activate the connection. Enter the Bluetooth password (passkey) when prompted. Read your headsets user guide on how to activate the connection.

Note : If you have gone out of range and the connection is lost, you can reactivate the connection again by first confirming the  icon on your S750/S750i and then re-activating the connection from the headset.

Using the Bluetooth headset for making or receiving a call

Making a call

1. Connect your S750/S750i with the headset. (Refer to “Connecting your S750/S750i with the headset.”)
2. Make a call using your S750/S750i.

Note : You may be able to make a call using the headset to your last redialed phone number. Read your headset user guide for details on how to make calls using the headset.

Receiving a call

Be sure to connect your S750/S750i with the headset before receiving a call using the headset. (See above "Connecting your S750/S750i with the headset.")

Follow the headset user guide to receive a call.

Note : You can activate your Bluetooth headset after making or receiving a call. Make sure you have activated the standby for connection mode on your handset and confirmed the  icon is displayed before making or receiving a call. While the call is in progress, connect to the phone from the headset, then press [Options] and select **Connect to Bluetooth** and press OK on your phone to switch to the headset, then begin using your headset. The method of connecting from your headset to your phone may differ depending on the headset. Refer to your headset user guide for details.
